

Pick a message

List of all saved messages.

Pick a sequence

List of all saved sequences.

When a sequence is selected, its steps are listed below.

Manage actions

Create an action, save it or delete it.

Edit action

A Json editor to edit messages and sequences.

1 Open/Close configuration file editor

2 If 'loading', means the server is running and the renderer can receive the picked action.

3 Pick a message to be sent to the renderer. Only active if a message is selected.

4 Pick a sequence to be sent to the renderer. Only active if a sequence is selected.

5 Pick the action shown in the editor to be sent to the renderer.

6 Current action: picked action currently sent to the renderer.

7 Selected action: action currently shown in the editor.

8 Filter all action lists (case insensitive).
